A certified electrician must furnish sufficient power for proper machine operation and install any supplied receptacle. We recommend this equipment be on a dedicated and protected circuit. Failure to wire properly will void the warranty and may result in damage to the machine. It is Gold Medal Products Co.'s recommendation that this machine be plugged directly into a wall outlet. The use of extension cords is not recommended due to safety concerns, and may cause sacrificed and/or reduced performance. Make sure cord is located to prevent a trip hazard or unit upset.

Before You Plug In Machine

1. Make sure all machine switches are OFF before plugging equipment into receptacle.
2. Make sure wall outlet can accept the grounded plugs (where applicable) on the power supply cord.
3. The wall outlet must have the proper polarity. If in doubt, have a competent electrician inspect the outlet and correct if necessary.
4. **DO NOT** use a grounded to un-grounded receptacle adapter (where applicable).
5. Install unit in a level position.

OPERATING INSTRUCTIONS

1. Place the bun warmer on a solid, level surface.
2. Plug warmer into an appropriate outlet, following the guidelines set forth above in “Electrical Requirements.”
3. Open front drawer and remove drawer pan and false bottom, and carefully set them aside.
4. Pour enough water into the drawer to cover the bottom of the drawer. Approximately 1/8” deep. (This provides the humidity to keep the hot dog buns from drying out as they are heated.
5. Replace false bottom and drawer pan, then close the drawer.
6. Turn the temperature dial to 140-160 degrees and allow the unit to preheat for 15-20 minutes.
7. Place desired amount of hot dog buns in drawer pan.

Note: Check for water periodically to ensure proper humidity. The machines water consumption varies with temperature setting, machine usage, etc. Empty water from drawer, and clean nightly to prevent product contamination. If machine runs out of water, the hot dog buns will become hard and dried out.
